PROFESSIONAL SUMMARY

Senior Frontend and Full Stack Software Engineer with 4 years of experience delivering scalable web platforms, enterprise ERP portals, and SaaS products. Proven track record architecting corporate Design Systems with 500+ components (cutting frontend delivery time by up to 70%), optimizing Core Web Vitals to achieve near-100 Lighthouse scores, and engineering resilient full-stack applications with React, Next.js, TypeScript, Node.js, and PostgreSQL.

TECHNICAL CORE COMPETENCIES

Frontend Engineering: React (18/19), Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Design Systems (500+ components), HTML5 / CSS3

Performance & Architecture: Core Web Vitals Optimization, Lighthouse ~100, WCAG 2.1 AA Accessibility, Zustand, TanStack Query, Microfrontends

Backend & APIs: Node.js, NestJS, Express, Fastify, C# / .NET, RESTful APIs, JWT Auth / RBAC, Webhooks

Database & Cloud: PostgreSQL, Supabase, SQL Server, MySQL, Prisma ORM, AWS (S3, API Gateway), Docker, CI/CD

AI & Tooling: AI-Assisted Software Engineering, Claude Code, Prompt Engineering, Git / GitHub Flow, Jest / RTL

BEHAVIORAL COMPETENCIES

Technical Leadership & Mentoring | Clear Async Communication | Product & Business Acumen | Pragmatic Problem Solving | Autonomous High-Standard Delivery

PROFESSIONAL EXPERIENCE

Domus - Sua Solução Digital

Senior Software Engineer | Frontend & Full Stack Developer

Oct 2025 – Present | Remote | Contract

End-to-end development of digital products, scalable SaaS platforms, and enterprise administrative solutions.

- Engineered full-stack websites, SaaS products, and administrative platforms across 20+ digital projects using React (18/19), Next.js (App Router), TypeScript, and Node.js.
- Designed and deployed reusable React and Next.js foundations applied across 10+ production products, ensuring high maintainability.
- Developed resilient REST APIs, webhook handlers, and database persistence utilizing PostgreSQL and Supabase.
- Achieved near-100 Google Lighthouse scores across Performance, SEO, Accessibility, and Best Practices through strict Core Web Vitals optimization.
- Reduced exploratory and repetitive development cycles by approximately 35% via AI-assisted software engineering practices (prompt workflows and test automation).

Technologies: TypeScript, React, Next.js, Node.js, Express, Fastify, PostgreSQL, Supabase, REST APIs, AI Workflows

SIVIS Tecnologia

Frontend & Full Stack Engineer | Integrations

Nov 2025 – Present | Remote | Contract

Frontend architecture, corporate system modernization, and enterprise API integrations.

- Modernized React, Next.js, Angular, and TypeScript interfaces across 15+ production corporate applications.
- Connected frontend user experiences to REST APIs and backend services across 10+ operational integrations, reducing visual rework by 25% through standardized componentization.
- Optimized PostgreSQL and MySQL relational queries supporting heavy reporting workflows, reducing database response times by approximately 35% in production.

Technologies: React, Next.js, Angular, TypeScript, Node.js, PostgreSQL, MySQL, REST APIs, Git

Autocom3

Frontend Lead & Full Stack Engineer

Nov 2024 – Present | Volta Redonda, Brazil | Hybrid

Development of high-scale enterprise ERP platforms, unified web portals, and corporate Design System governance.

- Architected and governed the corporate Design System with 500+ reusable components, accelerating new screen delivery by up to 70% across engineering squads.
- Engineered unified ERP portals with 100+ production pages serving more than 20 corporate client organizations daily.

- Improved enterprise application performance by reducing initial load times by up to 40% through frontend architecture optimizations.
- Developed secure REST APIs, JWT authentication, RBAC authorization, event-driven webhooks, and integrations across Node.js, C#, .NET, PostgreSQL, and SQL Server.
- Configured deployment pipelines and AWS cloud services (S3, API Gateway) while enforcing code quality through peer code reviews.

Technologies: TypeScript, React, Next.js, Node.js, NestJS, C#, .NET, PostgreSQL, SQL Server, AWS, Docker, Design Systems, REST APIs

Centro Universitário de Volta Redonda (UniFOA) & SEBRAE

Technology Mentor

Jun 2024 – Dec 2024 | Volta Redonda, Brazil | On-site / Temporary

Technical instructor and mentor in the EvaTech program focused on digital skills, generative AI, and modern software engineering.

- Facilitated hands-on workshops on Generative AI, prompt engineering, programming fundamentals, and technical problem-solving for 30+ participants.
- Mentored junior engineers and participants through real-world technology projects over a 7-month mentoring engagement.
- Developed structured educational materials translating complex software concepts into accessible, practice-oriented training.

Technologies: Generative AI, Prompt Engineering, Agile Methodologies, Technical Mentoring, Leadership

SIVIS Tecnologia

Junior Full Stack Engineer

Aug 2022 – Jun 2024 | Volta Redonda, Brazil | Hybrid

Building corporate dashboards, ERP business modules, and relational database integrations.

- Built React, TypeScript, and JavaScript interfaces for ERP modules and corporate administrative platforms (30+ production interfaces delivered).
- Developed 20+ REST APIs and integrations connecting frontend applications, backend services, and relational databases.
- Collaborated in Agile squads (Scrum/Kanban) performing code reviews, pair programming, and stability improvements that reduced production bugs by 20%.

Technologies: React, TypeScript, JavaScript, Node.js, C#, PHP, PostgreSQL, MySQL, REST APIs, Scrum, Git

EDUCATION

Bachelor of Science in Information Systems | University Center of Volta Redonda (UniFOA) | Expected Graduation: 2025

LANGUAGES

English: Full Professional Proficiency (Written & Verbal Technical Communication) | Portuguese: Native

CERTIFICATIONS

Frontend Engineering & UI/UX Design Certification | Origamid | 2023
